<b>Projects</b>	<b><u>Priorities Portal</u></b>	<b><u>Weathr Forecastr</u></b>	<b><u>Cleanse</u></b>
	A web app to assist people in prioritizing their life. Users can create an account and populate "to-do" lists in order to stay more organized. Built with Ruby on Rails, JavaScript, and HTML/CSS.	A web app where users input a city and state, or zip code and receive the 2, 5, or 7-day weather forecast for that location. This project served as motivation to learn and implement AngularJS and RESTful APIs.	An iOS app aimed at streamlining how iPhone users declutter their photo libraries. Developed in one week on a 3-person team as our final project at Dev Bootcamp. Built with Swift in Xcode.
